Fresh water: good fresh water is available on the uninhabited island of Paliáu.

6: Senfft--53 (no date) 1905 Woleaians
116, 312 Woleai

There are no natural springs since the islands are so small. On those islands which are inhabited there are wells in which the water is slightly brackish but quite good. The water from the wells on other islands is said to be so bad that it even harmed the pigs which were formerly kept there.
